

Computational Imaging - Course Notes

Here are the course notes for the currently running lecture **Computational Imaging** taught at Karlsruhe Institute of Technology (see <https://computational-imaging.de>).

! Attention

The presented content is always under construction and will be continuously updated during the course of the lecture.

Comments, questions and suggestions are very welcome and can be addressed to johannes.meyer@iosb.fraunhofer.de.

- [Introduction](#)
- [Fundamental Basics](#)
- [Light Field Methods](#)
- [Light Transport Analysis](#)
- [Neural Networks for Computational Imaging](#)
- [Inverse Problems in Computational Imaging](#)
- [Lensless Imaging](#)
- [Coded Exposure Photography](#)
- [Quantitative Phase Imaging](#)
- [Coded Aperture Spectral Snapshot Imaging](#)
- [Time-Of-Flight Imaging](#)
- [End-to-End Optimization](#)
